

**Johnson
Screens**

**A brand of
Aqseptence Group**

New Passive Intake System Design

Johnson Screens' next generation Passive Intake Screen, the Max-Flow™ design, increases flow capacity of the previous designs by up to 40% more.

The new patent-pending design offers significant capital savings in any intake project by using smaller and or

less number of intake screens. Additionally, a smaller Hydroburst System and significant less costs for the piping and civil work on a project will further increase project savings.

New patent-pending design

New features include:

- 1.4 times more capacity than the previous design
- Newly redesigned internal modifier
- An efficient means to withdraw water by evenly distributing flow and reducing the velocity to a 0.5 feet per second or less
- Non-plugging design is easy to maintain using Johnson Screens patented Hydroburst screen cleaning system
- 316b compliant intake screens
